Remerciements

Le comité d'organisation remercie l'Université Lumière Lyon 2 et l'École normale supérieure Lettres et Sciences humaines pour leur soutien à cette manifestation.

PRESENTATION DU CONGRES / CONFERENCE PRESENTATION

Organisé par le Laboratoire ICAR (CNRS, Univ. Lyon 2, ENS LSH), *Interacting Bodies / Corps en Interaction* est le deuxième congrès de l'*International Society for Gesture Studies* (ISGS) dont la première édition se tint à Austin en juin 2002.

Son premier objectif est d'accroître et de renforcer le réseau international des scientifiques qui mènent des travaux en lien avec l'étude des gestes, la recherche sur la multimodalité dans les interactions sociales et l'analyse de données vidéo.

Il réunit des chercheurs issus de différents horizons disciplinaires et culturels et constitue un forum international dédié à l'ensemble des thèmes se rapportant à la gestualité et à ses effets structurants sur le langage, la cognition et l'interaction humaine.

Plus précisément, la thématique *Corps en interaction* souligne l'importance d'étudier les multiples façons dont les gestes et les diverses formes de comportements corporels signifiants sont coordonnés par les participants à l'interaction : comment se synchronisent-ils avec les autres dimensions du comportement humain, telle la structure linguistique des énoncés, et comment s'articulent-ils avec les traits spécifiques du contexte situationnel, et en particulier spatial, des interactions humaines.

Le congrès porte également une attention particulière sur les questions méthodologiques relatives aux différentes approches théoriques et disciplinaires de la gestualité, ainsi qu'aux diverses pratiques d'analyse de la vidéo, ou aux aspects techniques du traitement des images et de l'annotation des mouvements corporels.

Organized by the ICAR Lab (CNRS, Univ. of Lyon2, ENS LSH), *Interacting Bodies / Corps en Interaction* is the second conference of the *International Society for Gesture Studies* (ISGS). The first edition was held in Austin in 2002.

The primary aim of this conference is to enlarge and to strengthen the international network of scholars working in fields related to gesture studies, research on multimodality in social interaction and video analysis. Moreover, it aims at bringing together researchers from various disciplinary and cultural backgrounds and offer an

international forum on topics broadly covering the different aspects of gestures and their structuring effects on language, cognition, and human interaction.

More specifically, the main focus of *Interacting Bodies* is to examine the different ways in which gestures and the various forms of signifying bodily conduct are coordinated by interaction participants, how they are synchronized with other dimensions of human conduct, such as the linguistic structure of utterances, and how they are organized with regard to the specific features of the situational and, in particular, the spatial context of human interactions. The conference will also put a special emphasis on methodological questions focussing on the different theoretical and disciplinary approaches to gesture, as well as on the various ways of doing video analysis or the technical aspects of image processing and the documentation of body movement.

Coordination scientifique / Program chair

Lorenza Mondada (ICAR)

Président honoraire / Honorary chair

Jacques Cosnier (ICAR & ISGS Vice-President)

GESTURE

Edited by Adam Kendon and Cornelia Müller

ISSN: 1568-1475 / E-ISSN: 1569-9773

ISGS MEMBERS SPECIAL SUBSCRIPTION OFFER

The journal *GESTURE* is associated with the International Society for Gesture Studies. It publishes articles reporting on original research, as well as survey and review articles, on all aspects of gesture. The journal aims to stimulate and facilitate scholarly communication between the different disciplines within which research on gesture is conducted. For this reason papers written in the spirit of cooperation between disciplines are especially encouraged.

GESTURE offers a wide range of articles, from establishing and improving theories and research methods, to comparative studies and field-work results. *GESTURE* covers such disciplines as linguistics, archaeology, anthropology, biology, communication studies, neuroscience, cognitive psychology, computer engineering, ethnology, theatre studies, literature and the visual arts. Additional audio and visual data are available in the online edition of *Gesture* and on CD-Rom.

Regular subscription rate Vol. 5 (2005), ca. 300 pp.:
EUR 185.00 (incl. postage/handling, electronic access, and CD-Rom)

Individual members of the **ISGS** are entitled to a membership discount rate:
EUR 70 only (plus 6% VAT within the EU, incl. postage/handling, electronic access, and CD-Rom) via the ISGS web site or write to subscription@benjamins.nl

**Contents and abstracts, guidelines for authors
and a free sample issue are available at**
